Databases: MySQL, MongoDB

Software Development Tools: IntelliJ IDEA, Visual Studio Code

Frameworks and Libraries: React, Node.js, Express.js, Apollo, GraphQL, jQuery, BootStrap, Tailwind, Bulma

Version Control: Git

PERSONAL PROJECTS

Superhero Showdown
- Superhero Showdown is an interactive web game that combines the powers of React, Node.js, Express.js, MongoDB, GraphQL, Apollo, and Heroku. With two exciting game modes, 'Higher Lower' and 'Draft Game', players can immerse themselves in the world of superheroes. In 'Draft Game', strategic team building and turn-based battles await, while 'Higher Lower' challenges players to compare and choose attributes wisely. Game stats, powered by MongoDB and GraphQL, are securely stored and accessible in user profiles. With a responsive and engaging user interface built using React, Superhero Showdown delivers an exhilarating gaming experience for superhero enthusiasts.

Mental-Oasis
- Mental-Oasis is a web application that allows users to keep track of their mental health by providing a medication intake tracker, a calendar to track good days and bad days based on user responses, input journal entries, and links to several helpline websites. All of the user responses are saved into a mySQL database that help users with their mental health needs.

Bite-Bud
- Bite-Bud is a web application that allows users to search for local restaurants and attractions in any city and state of their choice. The application retrieves data from third-party APIs to provide users with relevant information about nearby restaurants and attractions.

VOLUNTEER EXPERIENCE

Hillsborough County Pet Resource Center (2016 - 2019)
Sanitize kennels, organize adoption appointments, distribute food and water to all animals at the animal shelter

CERTIFICATES

University of Central Florida Full-stack Bootcamp
Simulates a professional work environment by teaming up with peers on real-world projects and build complex applications.
